

LP19 Easyflex

LP19 Easyflex is an advanced chair mechanism design that provides self-weighting motion for conference or soft seating designs. With a pair of slim cartridges applied on the left and right side of the chair, the Easyflex is capable of being fully integrated and hidden. The LP19 Easyflex is lockable in the front position, and ideal for mesh seating and elastic membrane seats.

- Self-weighting synchronous motion
- Backrest travel of 20° and seat travel of 6°
- Cartridge options provide standard and lateral fixation backrest support
- Ideal for mesh and elastic membrane seating
- Customized seat support (plastic or aluminum) options available
