Northfield T3001 Tilter Series

T3001 Tilter Series

T3001FTS TL TA 18M 2.25 BLK 17-4E

Multi-Task chairs are generally specified for 'Task Specific' uses such as administrative, data processing, switchboard, and customer service applications when the tasks at hand require long periods of seated work.

The T3001 Tilter from Northfield was developed with all this in mind. A responsive and versatile tilter, the T3001 mechanism is designed for use on medium to large size chairs. The mechanism is equipped with Infinite Tilt Lock for independent back adjustment and a Top Activation lever for pneumatic height adjustment.

The T3001 series can also be outfitted with several separate back adjustment options to complete your chair requirements.

Northfield T3001 Tilter Series Options

A Handwheel Options

5 Star (Standard)

Northfield Round

Doerner Round

† Customer is to specify arm bracket Length and Location for the ADJ2 Welded Arm Bracket.

E Side Tension Options

Crank Style

Round Handwheel

Tri-Lobe

F FTS Lever Options

S-Knob

Arrowhead

* FTS - Front Tilt Stop

The FTS lever is located in the front of the mechanism on the right side. To operate the FTS lever twist the lever forward or rear ward. If the lever is twisted forward the FTS block will slide forward allowing the seat of the chair to tilt approximately 6.75 degrees forward. If the FTS lever is twisted rearward the FTS block will slide towards the mechanism. This will restrict the front tilt of the seat approximately 3.5 degrees rear ward.

[Note: To operate the FTS option lean slightly rearward to make the adjustments. This will allow the FTS block to move freely.]

There are two styles of levers available, standard (bent) or straight.

Specifications

MECHANISM FEATURES

TA – Top Activation

TL – Infinite Tilt Lock

HD – Heavy Duty Spring

Auto Seat Slider – Integrated Automotive Style and Cam Activated Seat Sliders (2.50" of travel seat slider factory installed)

BUMPERS

Standard Bumper – The standard bumper does not allow forward tilt. The mechanism stops 3 ½ degrees rearward.

FT – Front Tilt Bumper: used when 6 ¾ degrees is required without using an extra lever.

FTS – Front Tilt Stop

Tall Rear Bumpers – These bumpers are used to reduce the seat travel by 10°, 12°, or 17°.

ARM BRACKETS

ADJ2 – Adjustable Arm Brackets

AT2 – Fixed Arm Bars

GAS CYLINDER TAPERS

17-4E Extruded 17-4 Taper

MECHANISM ANGLES

Seat – Forward Tilt 3.5° rearward
– Rearward Tilt 20°
