

Alpha Arm

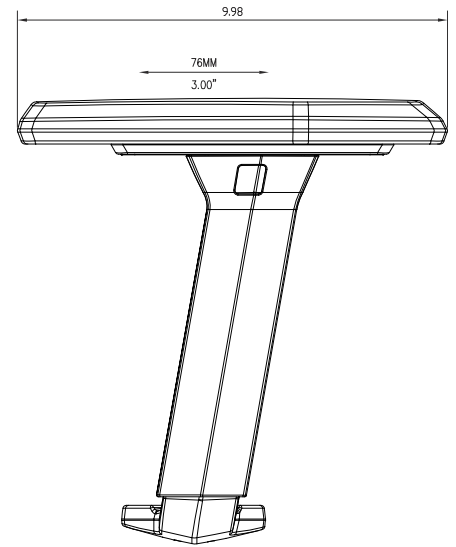

This multifunctional, high performance telescoping arm is designed with height, depth, and pivot adjustability. Activated by a button trigger, Alpha features 4 inches of vertical travel to help relieve upper back and shoulder fatigue. 3 inches of front-to-back friction-activated depth adjustment allows the user to get closer to their work surface while maintaining effective use of the backrest. The 30 degree inward/outward pivot provides the user with proper forearm support for various tasks such as keying and mousing.
